## THE YARDSTICK OF SERVICE

Enduring satisfaction is gauged by the competency and timeliness with which any service is rendered.

Our customers know that filling orders from our complete stock of appliances and materials made by leading manufacturers in the industry, in addition to all S. S. White products, is accomplished intelligently, accurately, and promptly. All molds and shades of Dentists' Supply, Steele's Facings and Denta Pearl Teeth are available in our Tooth Department.

Mail or 'phone us your requirements. In that way you'll convince yourself that we are fully prepared to serve you efficiently. You'll find the S. S. White General Catalog an aid in your practice. Ask for a copy.

*Contributions:* Manuscripts should be typewritten, double spaced, and the original copy should be submitted. Every effort will be made to return unused manuscripts, if request is made, but no responsibility can be accepted for failure to do so. Anonymous communications will receive no consideration whatever.

Manuscripts and news items of interest to the membership of the Society are solicited.

Forms close on the first and fifteenth of each month. The early submission of material will insure more consideration for publication.

Published semi-monthly by the Chicago Dental Society. Publishing, Editorial and Advertising Office: 30 North Michigan Avenue, Chicago 2, State 7925. Annual subscription \$2.50; single copies 15 cents; circulation 6,000 copies.

# THE CALENDAR

---

- November 4**      **SOUTH SUBURBAN BRANCH:** The next regular monthly meeting will take place at Surma's Restaurant, 175th and Western Avenue, at 6:30 p.m. Dr. Kenneth Penhale will discuss "Differential Diagnosis."
- November 11:**    **ENGLEWOOD BRANCH:** The regular meeting will be held at the Hayes Hotel at 8:00 p.m. Mr. Perce Brautigan will give an address on Americanism and associated veteran topics.
- November 11:**    **WEST SIDE BRANCH:** At the next regular meeting there will be a pre-dinner lecture by Dr. Kurth on "Impression Technic."
- November 11:**    **NORTHWEST BRANCH:** The regular monthly meeting will be held at Stella's, 3208 N. Kostner Avenue.
- November 18:**    **CHICAGO DENTAL SOCIETY:** The regular monthly meeting will be held in the Tower Ballroom at the Stevens Hotel. Two essayists, Dr. Robert G. Kesel and Dr. L. S. Fosdick, will discuss caries control. Following the meeting a number of interesting and practical table clinics will be presented.
- December 1:**      **NORTH SIDE BRANCH:** The next regular monthly meeting will be held at the Edgewater Beach Hotel.

## **Dr. Robert G. Kesel Elevated to Presidency of State Society**

**New Officers Will Be Installed in January**

Dr. Robert G. Kesel of Chicago is the new President of the Illinois State Dental Society. Dr. Kesel, who has served as Treasurer and President-Elect, will assume his duties on January 1, 1948, when the Society year begins. Taking office with him will be Dr. John W. Green of Springfield, President-Elect; Dr. Clifton B. Clarno of Peoria, Vice-President; Dr. Paul W. Clopper of Peoria, Secretary; and Dr. Glenn E. Cartwright of Chicago, Treasurer. New Councilmen representing Group # 3, the Chicago district, are Dr. Thomas Starshak of the Englewood Branch and Dr. George Hax of the North Side Branch. They will serve for a term of three years.

### **PROGRAM**

The 83rd Annual Meeting opened auspiciously on Wednesday, October 8, with a golf tournament and bowling congress, which culminated in the evening with a sports dinner at the Hotel Pere Marquette, the headquarters. Thursday, October 9, witnessed the opening of the scientific sessions and the presentation of the first essayist, Dr. Cecil H. Bliss of Sioux City, Iowa. Dr. Bliss proved to be a most interesting and entertaining speaker. His subject, "Strategy in Handling Patients," covered the

vast field of practice management and brought home the curious fact that a pleasing personality is oftentimes more of a practice builder than mechanical ability. (Of course, it's nice to have both.)

President Lloyd H. Dodd of Decatur delivered the President's Address at the Thursday morning session in his usual accomplished manner. He reviewed the activities of the officers and committee chairmen for the past nine months and reported an all time high in membership with over 5,500 on the rolls.

Dr. Raymond L. Girardot of Detroit and Dr. Lyle F. Aseltine of Chicago shared the rostrum on Thursday afternoon. Dr. Girardot discussed "Partial Denture Prosthesis." He emphasized the need of the proper diagnosis of a case before designing a restoration for it and stressed the importance of eliminating trauma on the abutment teeth in its construction. Dr. Aseltine read a paper on "Oral Surgery of Interest to the General Dentist." He followed this with a series of lantern slides illustrating the operative procedures. His presentation was, as announced, directed to the dentist in general practice and, therefore, of inestimable value.

The Annual Banquet, Thursday evening, was well attended and those pres-

*(Continued on page 23)*

# North Suburban to Present Clinic Day Program

Annual Event Scheduled for Wednesday, November 12

Wednesday, November 12, has been selected by the officers of the North Suburban Branch as the day for its renowned Clinic Day Program. The North Shore Hotel, Evanston, again will play host to the dental profession and will have its facilities in order by 10:00 a.m. to entertain any and all comers. At this hour the manufacturer's table clinics will be set up and ready. Those who take advantage of the morning hours to visit the manufacturer's clinics will be well rewarded because at that time of the day, there will be plenty of elbow room. A score of outstanding clinicians will be in attendance and will demonstrate many of the newer materials, so be on hand early.

## LIMITED ATTENDANCE CLINICS

Three limited attendance clinics will be presented; once at 10:30 in the morning and again at 3:30 in the afternoon. The clinicians are: Dr. Kenneth Bignell, "Hydro-Colloid—Its Use in Securing Accurate Impressions for the Construction of Inlays, Crowns and Bridges by the Indirect Method"; Dr. Philip J. Modjeski, "Hollenbeck Investing Technique"; Dr. Francis J. Pelka, "Crowns, Bridges and Acrylics." Those desiring to attend the limited attendance clinics should send their applications to Dr. Russell H. Johnson, 333 Park Avenue, Glencoe, Illinois, enclosing \$1.00 for each clinic.

The annual luncheon for educators, public health nurses and P.T.A. members will be held at 12:15 p.m. Dr. Edward J. Ryan, Editor of Oral Hygiene and Dental Digest and a past president of the Chicago Dental Society, will be the speaker.

Because of the limited capacity of the room assigned to this function, tickets will not be available to dentists.

## LECTURES AND CLINICS

Dr. Gustav W. Rapp of Loyola University will lecture on "Topocaine, The New Topical Anesthetic for Cavity Preparation" at 1:45 p.m. This lecture will be open to everyone. Dr. Rapp has achieved an enviable record since coming to Chicago and the results of his research in the field of anesthetic agents are an outstanding contribution to dentistry. In Topocaine, he has discovered an agent that really works.

All three of Chicago's dental schools are sending representatives to participate in the general clinic program. Among the clinicians will be the following: Dr. Gerald J. Casey, "Benzyllog, A New Drug in Root Canal Therapy"; Dr. William S. Martin, "Root Resection of a Filled Root"; Dr. Raymond Coveny, "Partial Denture—Roach Design," and Dr. Richard Thometz, "Orthodontia." The dental assistants and dental hygienists associations also will send representatives.

## EVENING BANQUET

The Annual Banquet will take place at 6:30 p.m. in the Ballroom of the North Shore Hotel. The usual festivities will precede the dinner, which promises to be one of the North Shore's finest. Mr. Paul G. Dollwig, Layman Lecturer of the Field Museum, will be the banquet speaker. He is internationally known for his inspirational, informative and entertaining lectures.

## Caries Control Program Promises to Be a Standout

Doctors Kesel and Fosdick Head Lineup for November Meeting

Clinicians and essayists who have helped make the midwest synonymous in the dental field with caries control will appear on the program at the November Monthly Meeting of the Chicago Dental Society. This meeting will be held in the Tower Ballroom of the Stevens Hotel on Tuesday evening, November 18. Leading the array of scientists who will participate are: Dr. Robert G. Kesel of the University of Illinois, College of Dentistry, and Dr. L. S. Fosdick of Northwestern University. Both of these men are outstanding in their respective fields and have done an infinite amount of research into the causes of dental caries. They have reached, by now, certain definite conclusions and will present facts rather than fancies.

Collaborating with them with clinical material will be at least one staff member from each of the three dental schools of Chicago. Dr. Edward C. Wach of Illinois, Dr. Gerard J. Casey of Loyola, and Dr. William E. St. John of Northwestern have sent in acceptances. Several other clinicians will participate but their acceptances had not been received at the time of going to press.

### RESEARCH TO DATE

Almost everyone is cognizant of the remarkable strides that have been made in recent years in the control of dental caries. Dr. Kesel first reported the results of his work in his prize winning essay which was read before the 1946 Midwinter Meeting. At that time he stated that he and his associates had found that the development of ammonia nitrogen in the mouth possibly was responsible for the

absence of dental caries which some people naturally exhibit. He reported further that the incorporation of ammonia compounds in a tooth powder and mouth rinse had resulted in the reduction of acid-producing bacteria in the mouths of persons using them. Dr. Fosdick is widely known for his development of the caries susceptibility tests. As a chemist he has approached the subject from the strictly scientific viewpoint. Both he and Dr. Kesel will stress the mechanics of the caries process, on the basis of which new methods of caries control will be proposed.

### TABLE CLINICS

Doctors Wach, Casey and St. John, the three table clinicians, are well known in Chicago Dental Society circles for their interest in the field of caries control. Dr. Wach will demonstrate how to determine caries susceptibility by use of ammoniated powder and rise. He will portray the effect of their application over stained plaque areas and will show their efficiency in the removal of them. Tabulation of the results of the clinical use of these ammonia compounds over a period of one and a half to two years will also be shown.

Dr. Casey will present methods of caries control that are most successful in dental office use. Dr. St. John will base his clinic on the Snyder Test for caries activity. This test employs a nutrient agar containing an instructor that changes color with a change in hydrogen ion concentration. The test is simple, fast, accurate and economical.

# What Now?

By Frederick T. Barich

Life, to us mortals, is one of the most perplexing phenomena. Where it came from, what it is, and whence it is going further complicates this biologic puzzle. Men of science have worked long and hard to find the solution. They have come forward with innumerable findings relative to intricate structure, function, and final disposal of the fundamental organism. Scientific literature, in all of its branches, contains volumes of material to which many men would have to devote lifetimes in perusal alone. Additions to the above are rolling off the presses at a rate faster than the scholar can keep abreast of them. Sooner or later the most ardent researchers become lost in the maze of those intricate patterns. Certain phases of the overall patterns are pursued intently; so when one becomes versed in all of the ramifications of said pattern he is termed "master" by man-ordained decree. How interesting that is? It means little in the overall sense of the word; it means, simply, that

he knows a trifle more than his average brother in one segregated branch, or stitch if you will, of one tiny part of the selected pattern phase. In order to realize individual limitation, thumb through an anatomy text-book. If this doesn't leave you in a state of complete humility, I'll miss my guess!

Life has been compared to a lighted room in total darkness with open windows at either end. A bird flies in, chirps, feeds, and preens its feathers; then takes wing again and flies out the other window into total darkness. From whence it came no one knows; while in the lighted room it is likened unto Life; whither it goes is any man's guess. There are flaws in the above reasoning, of course; and anyone who understands bird culture, habits, banding, etc., knows that said denizen of field, forest, plain, or water could be sleuthed accurately for the whence and whither above. It is not that easy.

We, they, in fact every biologic form comes into being by many and devious routes well known to science; but the whence and the whither are still closely guarded secrets. It is known, however, that the individual grows and develops toward maturity, and that it is composed of chemicals in various and intricate combinations. Something, though, is still baffling and that is LIFE itself. What is this mysterious quality given to chemical combinations in myriads of forms? No mortal being knows the answer. Man has tried and is still trying to produce it in the test tube,—he has failed and is still failing. This is one phase, yes, the most important phase, which will never be solved because it goes above and beyond comprehension of the human mind.

Learned men have stated that Life commenced on a seashore in a sub-tropical climate where certain basic chemicals automatically combined under ideal conditions of temperature, barometric pressure, etc., and progressed under those same ideal conditions to the point where we find ourselves at the moment. If you ask them where the seashore, chemicals, ideal conditions came from, they are at a loss for the answer. Theories of this, that, and the other have been propounded by intelligent, earnest men who seek the answer. Some sound well and deserve consideration; others will bear up for a while until new truths are established. The old may be discarded for the new; but man will always wonder about things which go far beyond his horizon.

If you think Life is confusing, cast a few glances to the Great Beyond. Scratch,—one thinker!

# NEWS AND ANNOUNCEMENTS

---

## 125 AT GOLF OUTING

The Chicago Dental Society held its annual golf outing at Acacia Country Club, Wednesday, September 24. One hundred twenty-five members and guests were present to make the affair one of the most successful in recent years.

Chairman Lee Whitson and his committee came through with some nice prizes. The President's Trophy was awarded to the Branch having the eight low scores and Englewood won handily. Tom Cavanaugh and Jim McMahon tied for low gross with a pair of 76's and Cavanaugh cut the high card for first place. Bob Hannon won the low gross prize for guests. First low net was a tie between Lyle Aseltine and Paul Edmand with Aseltine winning the toss. In all, 75 prizes were awarded.

## JEWISH WELFARE FUND DRIVE

Dr. Herbert Goldt, Dr. Isaac Schour and Dr. Floris van Minden have been named co-chairmen of the Dentists Division in Chicago's Jewish Welfare Fund Campaign for \$12,000,000 for overseas relief by Mr. John Balaban, General Chairman of the Campaign.

These men are now in the process of organizing this campaign in Chicago, the funds of which will be used for the relief, resettlement and rehabilitation of Jewish men, women and children in Europe and Palestine.

The Dentists Division will hold a dinner on Wednesday evening, November 5, in the Florentine Room in the Congress Hotel at which a nationally prominent speaker will present the facts about the needs of a people who have been victims of the Nazis, and "who today, more than two years after liberation, are still struggling for a chance to earn a livelihood or are languishing in the DP camps of Austria, Hungary and Italy."

The dentists in Chicago will be interested to know that tens of thousands of dollars have already been spent this year to provide equipment for men in the dental profession who were robbed of their own equipment by the Nazis. Many thousands of dollars have also been spent for dental supplies so that these dentists can give dental service to the needy. Special clinics have been set up to help provide up-to-date information and to equip dentists to regain much of the skill they may have lost.

## THOMAS J. DEE & COMPANY ANNOUNCES MERGER

The long established Chicago firm of gold refiners, Thomas J. Dee & Company, has joined forces with Handy & Harmon of Bridgeport, Connecticut, and will henceforth be known as the Dee Division of Handy & Harmon. The two concerns have merged their facilities and personnel with a view to rendering improved materials and services to their customers.

The firm of Thomas J. Dee & Company was founded in Chicago in 1889. At that time, it engaged in the refining and manufacturing of precious metals, chiefly for the dental profession and trade. Mr. Dee, the founder, carried on the business until 1920 when his interests were acquired by Harry E. Radix and Thomas G. McMahon.

Harry and Tom, as they are universally known, brought many new ideas to their project, among them the establishment of a department of education and research. They acquired the services of an outstanding dental teacher, Dr. F. E. Roach, and he, together with Mr. Francis Moyer, has given hundreds of classes and demonstrations on the use of precious metal alloys in dentistry.

The Dee Division will continue to maintain a downtown office in the Pittsfield Building.

**DR. CLYDE H. WARNER**  
**1884-1947**

Dr. Clyde H. Warner, a member of the North Side Branch of the Chicago Dental Society and President of the Illinois State Board of Dental Examiners, died at his home in Northbrook, September 28, 1947.

Dr. Warner was graduated from the University of Illinois, College of Dentistry, in 1908 and practiced in the Field Annex for over thirty years. He was appointed to the State Board of Dental Examiners by Governor Horner and served the Board faithfully and well. Dental graduates liked his examinations, for his questions were always to the point. When he passed away he was the senior member of the Board. He was greatly interested in civic affairs and was Mayor of the Town of Northbrook for a number of years.

Dr. Warner is survived by his widow, Orpha, and a sister, Elsie Warner Kost.

**DR. LAZARUS M. LEVIN**  
**-1947**

Dr. Lazarus M. Levin, formerly a member of the Northwest Side Branch of the Chicago Dental Society, passed away recently at his home in Los Angeles, California. He retired from practice two years ago and moved to California. He is survived by his widow, Sophie, and two sons, Alfred and Emanuel.

**DR. GUY F. BAYLY**  
**1885-1947**

Dr. Guy F. Bayly, who practiced for many years in the Edgewater Beach Hotel, died September 25, 1947 at the Illinois Masonic Hospital. Dr. Bayly was a member of the North Side Branch of the Chicago Dental Society, having transferred from the Northwestern Ohio Dental Society eighteen years ago. He was graduated from the University of Pitts-

burgh in 1905. He is survived by his widow, Foreste.

**DR. RICHARD HOLIC**  
**1915-1947**

Dr. Richard Holic, a member of the Northwest Side Branch of the Chicago Dental Society, died September 4, 1947. He was struck by lightning just a few blocks from his home and killed instantly.

Dr. Holic was graduated from the University of Illinois, College of Dentistry, in 1939 and served in the Army Dental Corps during World War II in the South Pacific theatre. After completing his service he joined the teaching staff at his alma mater in the department of Full Denture Prosthesis and did considerable research in the field of centric relation. He had been scheduled as essayist for the October monthly meeting of the Chicago Dental Society on this subject.

Dr. Holic is survived by his widow, Marguerite, and a son, Richard John.

**DR. LOUIS L. BLISS**  
**1869-1947**

Dr. Louis L. Bliss, a practicing dentist in Chicago for forty-four years, passed away in Beverly Hills, California, September 10, 1947. He was formerly a member of the Kenwood-Hyde Park Branch of the Chicago Dental Society and was graduated from the Chicago College of Dental Surgery in 1903.

Dr. Bliss is survived by a daughter, Mrs. Umberto Young, and a son, Vincent R.

**DR. DANIEL S. VERTUNO**  
**1898-1947**

Dr. Daniel E. Vertuno, a member of the West Suburban Branch of the Chicago Dental Society, died August 18, 1947. Dr. Vertuno graduated from Northwestern University Dental School in 1924 and practiced in Oak Park. He is survived by his widow, Mildred.

# BOOK REVIEWS

---

## **"Acrylics and Other Dental Resins"**

by Stanley D. Tylman, M.S., D.D.S., and  
Floyd A. Peyton, Ph.D. Published by J. B.  
Lippincott Company.

The four hundred and seventy page book is divided into two parts, the chemical aspects and the practical aspects of the resins used for dental application, touching also on the use and development, by dentists, of the materials used in eye, digital, facial and body replacements at the present time.

Complete chemistry of the resins is given in comparative charts and forms which illustrate properties present and missing in the materials which have been discarded, are now in use, or may be adapted for future use.

Together with the history of the use of the resins for dentistry are outlined various published and accepted technics for the practical handling of the materials for replacements. These outlines include technic for partial and full dentures, crowns, inlays and bridges. Cavity and crown preparation, pattern preparing and handling, color values, processing and finishing are all illustrated.

Army and Navy eye technics are outlined and illustrated, as well as are the technics for the use and handling of materials for digital, facial and body replacements, using the flexible resins.

Dental companies who are fabricators and producers of the dental resins products have contributed much information and illustrations which are of additional value to the book.

A very comprehensive bibliography is an integral part of the book and includes reference to both foreign and domestic writings on the subject. A student of either chemical or practical aspects of the subject will find the references of tremendous value in further study.—*LaMar W. Harris.*

## **"Psychobiologic Foundations in Dentistry"**

by Edward J. Ryan, B.S.,  
D.D.S., Springfield, Illinois; Charles C.  
Thomas, 1946, 131 pages. \$3.00.

This very readable book is an introduction to a comparatively new and a most important subject, psychobiologic principles as applied to dentistry. It is "an attempt to outline the studies in constitutional physiology and pathology, and to make some interpretation that may be helpful in dental clinical practice."

The author approaches his subject in a refreshing manner, not as an expert but as one who is familiar with the everyday problems of an active dental practice. Beginning with prehistoric man, who had practically no dental worries, Dr. Ryan recounts man's difficulty in getting accustomed to the idea that if he doesn't take care of his teeth, his teeth will let him down. Even fifty years ago people had little opportunity to experience skillful dental treatment. Now that dentists have acquired the mechanical skill that is necessary for good dentist-patient relationship they should seek ways and means of acquiring the psychological skill that will give them a "clear knowledge of the uniqueness and the individuality of each patient."

The author evaluates individuals in terms of structure and temperament and stresses the necessity of understanding the whole patient and not just his dental derangement of the moment. Here is where "psychosomatic medicine" comes in and Dr. Ryan covers its application to dental diagnoses thoroughly.

One of the most interesting chapters of the book is entitled "Dental Diseases in the Seven Ages of Man." Dr. Ryan cleverly paraphrases Shakespeare and brings out that "in growth, development, latency, and decline, the pattern of nature follows a general plan, subject always to mutations and anomalies that

make the exceptions." The person who develops dental caries may need something more than a correction of the lesion. Rampant caries frequently follows periods of emotional and physical stress, especially in the adolescent, and such a person may require extensive psychotherapy in addition to the restoration of the family structure.

An extensive bibliography indicates an exhaustive review of all current related literature and the "meat" of the text shows a sound, practical working knowledge of the subject.—*E. G. Robbins.*

**"Dental Education Today"** by *Harlan H. Horner, Secretary of the Council on Dental Education, American Dental Association. 420 pages. Price \$6.00. University of Chicago Press, Chicago, Illinois.*

In this relatively short volume the author approaches dental education from the point of view of a layman and, as such, writes freely without caring too much if he steps on toes. This characteristic of his brought him some unfavorable publicity, not long ago, in the public press. However, he seems to have outlived that episode and has gone on to make a real contribution in the field of dental education.

"Dental Education Today," though full of statistics, makes interesting reading. The author has a mission to perform and does it adequately and well. He pleads for the autonomy of the dental profession and believes that "dentistry will claim its rightful place in the social order when it develops its teaching and its research on a parallel with medicine." He states that the dental schools in the United States are the best in the world but thinks that they should concentrate on "training scientists as well as craftsmen, men as well as dentists." He is disturbed by the fact that diagnosis and treatment planning are too frequently disregarded in teaching and that too much time and effort is spent on teaching restorative dentistry. Yet he admits that this feature is what attracts young men to the profession.

In tracing the history of dental edu-

cation in the United States, Mr. Horner goes back to the very beginning and carries on through to the present time. In the period 1840-1884 there were 29 dental schools established and of that number only eight have survived. Proprietary schools multiplied by leaps and bounds until, at one time, in Illinois alone there were 28 dental schools. Now there are 40 schools in the entire United States and all but 2 are affiliated with universities.

The author states that in the early days of dental education there was no accrediting agency and each school set its own standards. It was not until 1900, when the Dental Educational Council was formed, that standardization became a reality. This organization labored long and hard and in 1916 announced the minimum requirements for a Class A dental school. Two years later the course was lengthened from 3 to 4 years.

In the concluding chapter of the book, Mr. Horner takes a look into the future. He states that Utopia has not arrived in dental education. Lots of improvements should be made. Among these are: better provision for graduate study and research; better trained teachers, with a large proportion of the teaching load on full time teachers; counseling service for prospective students so that the best qualified students are enrolled; aptitude tests to be given to entering classes and, lastly, reforms in the curriculum. "The great challenge of the future, to all agencies of dentistry in common—schools, examining boards and practitioners—lies in the inescapable responsibility of carrying to humankind the fruits of science and the art the profession already possesses."—*James H. Keith.*

**"Practical Pedodontia or Juvenile Operative Dentistry"** by *Floyd E. Hogeboom, D.D.S., F.A.C.D., Professor of Children's Dentistry, College of Dentistry, University of Southern California. Former member of Children's Hospital staff, Los Angeles. Former member of health and development department,*

*Pasadena City Schools. Chairman, Dental Assistants Course, Los Angeles, 1930-1937. Fifth Edition. pp. 503; illustrated; cloth bound. Price \$8.50. C. V. Mosby Company, 1946, St. Louis.*

The introduction of this book contains an excellent explanation of the book's purpose, and by reading it one will derive a better appreciation of both the book and its author.

The book begins with some seasoned and sound advice for the beginning practitioner on the economics or business side of dentistry. Then the ever difficult subject of "Child Management in the Dental Office" is wisely dealt with. The author gives a list of a few, good, simple, general rules to be observed, permitting an excellent discussion by Forrest N. Anderson, M.D. on "The Mental Hygiene Viewpoint of the Child" to complete the subject.

Considerable space has been given to the discussion of the development of the child and the child's head. In the child's development, emphasis is placed on the embryology leading to facial formation and tooth development. In the child's head development, bone growth, musculature, dental transitional period, tooth resorption, rate of growth, and heredity are given varying importance.

The importance of radiography and thorough examination and diagnosis is pointed out. The author then proceeds with a foundation discussion of the deciduous teeth, with several pages on the dental anatomy of these teeth, after which operative procedures for children's dentistry are considered. The cavity preparations follow Black's principles, with a few minor innovations, and the filling materials used are the standard accepted ones. In addition, some interesting ideas on increasing the operator's speed are given.

The first permanent molar has been given excellent recognition and its importance, as well as the procedures necessary to preserve this tooth are discussed. There follows a closely related and valuable chapter on interproximal caries and preventive measures to be taken to pre-

serve teeth so affected.

The chapter on procedures and variation dealing with child habits which produce oral malformation is quite brief and not too helpful in the treatment of these conditions, but the following chapter on pulp treatment is excellent and is detailed enough to be very helpful to one desiring to attempt treatment of deciduous teeth.

Chapters concerned with biochemical aspects of preventive dentistry and prevention of caries by nutrition deserve to be read, for much is contained here that stimulates desired thinking on better preventive dentistry measures.

In the next few chapters we find a discussion of chrome alloy and plastic appliances; what to do in case of fractured incisor teeth; the difficult problems of preventive orthodontics; and some of the more common complications with regard to diagnosis and methods of treatment.

An interesting discussion on endocrinology and its relation to dentistry is then presented.

The final chapters of the book, concerned with Public Health and Dentistry, are certainly enlightening and contain some of the statistics on the findings of the Dental Corps in the recent war.

The author of this book is well known. He is both a very capable teacher and exceptional practitioner in the field of dentistry for children. This fact is certainly proven by the conservative and practical treatment of the subjects contained in this book, which in turn helps prevent radicalism in the student and the general practitioner.

It is your reviewer's opinion that the author has sacrificed a wonderful opportunity to make a very good book into an excellent one. It is evident that a serious and conscientious effort has been made to improve the fourth edition by the addition of new material, but considerable more good could have been achieved by reorganization of the old material. The information is definitely present but it is sometimes buried so deep that, for many readers, too much work is involved

in uncovering it. Nevertheless, this text is a valuable addition to any student's or practitioner's library.—*I. Milton Dawson.*

**"Oral Surgery"** by *Sterling V. Mead, D.D.S., M.S., B.S., Washington, D.C.* Third Edition, 1,449 pages with 809 color illustrations, 16 color plates. Price \$15.00. *C. V. Mosby Co., 1946, St. Louis.*

The third edition of Mead's "Oral Surgery" is a fine reference book for the oral surgeon, general practitioner and the student. The book covers the field of oral surgery diagnosis and treatment in a masterful manner.

This third edition is a larger book than either of the other editions. It has 1,449 pages as compared with 1,315 in the second edition, and 1,087 pages in the first. The increase in volume is also an increase in value. The author has added two chapters; one on chemotherapy, and one on the correlation of surgery and prosthesis and orofacial deformities. The plates and drawings are excellent throughout the book.

Dr. Mead gives methods of oral diagnosis, anatomic relations fundamental to operative surgery in mouth and adjacent structures. He deals with the preoperative preparation of the patient, selection of anesthesia and surgical technique. Advancing into the book there is an adequate discussion of the methods of removing impacted teeth, the surgical treatment of periodontal disease, the surgery of cysts and tumors and the treatment of jaw fractures.

The chapter, "Selection of Anesthesia," is handled in excellent style. It contains four times the material as in the previous

edition. Penothol sodium is fully covered in eight pages. The author gives warning that this anesthetic should not be used in an office unless the patient is accompanied by some other person. It seems too bad he did not say that it should *not* be used in any office.

The chapter, "Correlation of Surgery and Prosthesis in Orofacial Deformities," by *John J. Fitz-Gibbon* is an excellent additional feature. This is an important phase of the subject because only through the correlation of surgery and dentistry may orofacial cripples be given good care.

It is difficult for anyone to be an authority in the field of chemotherapy since there are so many new drugs coming from research laboratories. Dr. Mead has written on only two of these drugs—the sulfonamides and penicillin. Of all the sulfonamides he writes of the ones most commonly used by the dental profession; sulfanilimide, sulfathiazole and sulfadiazine. We readily agree with him when he states that these drugs are dangerous. He says that penicillin is neither a miracle drug nor a cure-all but it has been found to be effective in some cases where the sulfonamide has failed. There are different bacteria that are sensitive to penicillin where the former is ineffectual.

The author has quoted from many sources which creates an impediment to easy reading, although it is commendable to have used so many references. A bibliography follows each chapter.

This book contains much valuable and worth-while subject matter, drawings and plates. It is fortunate that this book has been revised.—*Russell G. Boothe.*

# NEWS OF THE BRANCHES

---

## NORTH SIDE

May we remind all members interested in bowling, to appear at the Bowling Lanes, 5221 N. Broadway. Wednesday, November 5, at 1:30 P.M. is the time. Come prepared to play. For further information, get in touch with Bowling Chairman H. M. Glass. . . . Our first meeting of the season went off with a bang. President Luebke officiated like an old-timer at the game, and cleared the business part of our meeting away in short order. He then turned the meeting over to Program Chairman Gieler. M. I. Gerry entertained with feats of magic. Dr. Robert R. Gillis of Hammond, Ind., spoke at some length on "The Denture Space and Its Registration in Full Denture Construction." The meeting was greatly enjoyed by all present, and if you weren't there, all we can say is, Don't forget the next meeting, Monday, December 1 at the Edgewater Beach Hotel. . . . William V. Sher attended his first North Side meeting as a token of esteem and respect for his classmate, our president. . . . George E. Lemire and Frank G. Hess, a couple of swell fellows, who don't come out too often, were also in attendance. . . . Harold G. Wedell has been ill at the Evanston Hospital. His son, a physician, flew up from Texas to visit him. North Side wishes you a speedy recovery, and hope that at this reading you are up and around, Harold. . . . Orville Bush has given up golf. It seems that after taking a good healthy swing at the ball, he would find it lying just a few inches from where he stood. I know just what you mean, Orville. . . . T. F. Courtney doesn't have any news, but he'd like to know where he can get a new car. I would like to refer you to past issues of The Fortnightly, where I have published the names of those driving new cars. Maybe one of them will tell you. . . . All the swallows but one have gone south. This one is owned by Elmer Behm,

and after a pleasant sailing season, he has drydocked it for the winter. . . . C. R. Bratt is one of those lucky fellows, who only works when he feels like it. He recently returned from a fishing trip up in Minnesota and now is making preparations for a sojourn to Tennessee. We'll expect a good news item when you return, C. R. . . . Louis Becker is already planning a Christmas trip to visit his sister in Miami, Florida. Come to think of it, it's only a good two months off. . . . Maurice S. Altus asks any member who has talent at entertaining to please get in touch with Program Chairman Gieler. . . . Carl S. Levin was married on September 30 to Miss V. Pernell. The happy couple are on their honeymoon, down in Florida. . . . Irving Gault says it would be headline news if he were to get a new car. I'd suspend this column for a couple of issues if I could get one, Irv. . . . Joe and Mrs. Gomberg are the proud parents of a swell boy. Lawrence Martin is a little past four months now. . . . Hans Lange caught an 18 pound muskie at his summer place at Three Lakes, Wisconsin, about a month ago. . . . In twenty years of practice, Harry J. Nehf has never been called for a news item. What's the matter with these correspondents? Harry doesn't care though, because his auto dealer called his number recently, and now he's sporting a new Ford. . . . Mike J. Schuffert take notice! Lock up your lawn mower and garden tools. Ernest R. Gillis has bought a new home next to yours. . . . Burt S. Morrow has just finished a season with the "Windy City" semi-professional league, playing soft ball. He's a prospect for the bowling league, as he bowled a 231 the other evening. . . . A. J. Koller was vacationing recently at Kenora, Canada. . . . Clarence Heamon and associates have opened the hunting season somewhere in South Dakota. . . . See you Monday, December 1, at the Edgewater Beach Hotel.—N. M. Elliott, Branch Correspondent.

A crowd of about 140 attended the open house on October 14. Shortly after 8 P.M. the hall and bar were buzzing with laughter and merrymaking. Many of the Northwest's old stalwarts were on hand, renewing acquaintances and making new ones. At about 10 o'clock the presence of a buffet luncheon on the table made many abandon the "chin fest" and head for the knife and fork. There were no formalities. Strictly social. And the event goes down in the Northwest Side's history as a SUCCESS. . . . As was previously announced, the Rover boys will be the essayists on Tuesday, November 11, 1947. Here is the batting order for the evening. Frank Biedka—"How to Develop a Practice"; Henry Boris—"Presenting a Case to the Patient"; Irwin Neer—"Streamlining the Dental Practice"; and Dan Klein—"How to Quadruple a Practice." Standing room only will be available after 8 o'clock, so assure yourself of a box seat for this great event by making your dinner reservation at once. Call Cas Rogalski, Pensacola 6747. . . . Your correspondent scooped the Illinois State convention. Limited space here prevents naming all who attended. However, here are the branch clinicians who contributed immensely to the success of the meeting. LeRoy Kurth presented a paper on "Full Dentures." Table clinicians were: S. A. Bonebrake on "Periodontia"; Bob Placek and H. P. Chott on "Simplified Cavity Preparation"; A. H. Tamarin on "Invisible Anchorage of Gold Inlays"; Peter Wlodkowski on "Surgical Preparation of the Mouth for Dentures"; George Matula on "Mouth Rehabilitation." . . . Our sympathy to the family of George Cappell who died recently. . . . Glenn Cartwright was elected Treasurer of the Illinois State Dental Society. Always on the go, eh, Knute? . . . B. Sacks was appointed Medal Award Chairman of the Ninth District of the American Legion. . . . James Guerrero is sporting in a new high powered Ford. See you soon!—*John M. Gates, Branch Correspondent.*

Don't forget the joint meeting at Vogel's, Indianapolis Boulevard and 116th Street, with Northern Indiana Dental Society and Eddie Ryan as essayist. A real treat is in store, so don't miss this opportunity to hear one of our ablest speakers. Good food, too! . . . Our October meeting was a banner meeting, and all who could crowd into the meeting room were given a presentation by Dr. A. L. Roberts of Aurora on "Denture Procedure" which will long be remembered. Thanks for a most helpful essay, and a really swell job. We were happy to have Drs. Karthieser, Freeman and Williams of Aurora visit with us. Thanks, too, to George Schmidt, Phil Mathisen and Roy Eberle for three fine clinics. We were happy to welcome and see a number of our new members, Harry Urban and Dr. Black, as well as Adolph Ziherle, R. Appleman and Abe Lebowitz, whom we haven't seen for some time. Englewood was well represented, too, led by President Bill Shippee, Ed Werre and Paul Kanchier, as well as Drs. Cavanaugh, Moran and Sousa. If I have missed anyone please excuse. . . . The Chris Davidsons have blessed evented. A six-week old Labrador retriever has come to live at the Davidsons, and Chris says that if he can outlast the housebreaking period all will be peaceful and serene. Good luck, Chris. . . . Kenwood was well represented at the State Meeting in Peoria in the persons of J. McBride, Larry Johnson, Willard Johnson, Byron Kelly, Ben Herzberg, Jesse Carlton, Harry Hartley, Les Boyd and our former member, Les Butler. . . . Gramps and Les gave table clinics on Saturday. It was one of the best meetings in many years. Syl Cotter was unable to attend because old man illness sent him into the hospital. From last reports he is doing O.K. Speedy recovery, Syl. . . . At the Boston meeting Syl was elected a member of the Executive Committee of the American Denture Society. Congratulations. . . . Ben Herzberg expects to move into his new building at 72nd and

Exchange about December 15. Maybe there will be office space available? . . . Our Dinner Chairman, Bob Rowan, did a swell and very efficient job, and we certainly appreciate it a lot, Bob. It's nice of you to step in and take hold. . . . Scotty Morange has arranged Manufacturers' Clinics for our December meeting. . . . Have you sent in your Community Fund check? Do it now! . . . Reed Thornton is harvesting a bumper grape crop, as is Scotty Morange. . . . A. M. Bressler, Mayor of Palos Park, is attending the Association of Commerce Meeting in Denver. . . . Any news call South Chicago 1823.—*Elmer Ebert, Branch Correspondent.*

#### **SOUTH SUBURBAN**

Our nomination of the month for the Badge of Courage is Hank Freitag of South Holland. He is building a house! We wonder if he plans to use old wooden shoes for flooring. . . . Neil Kingston came back from Hollywood and confessed that he had been offered several starring roles. He decided, however, that his duty to humanity came first and so returned to practice. . . . Bettenhausen managed to break away from Tinley Park for a slight sojourn in Seattle and points Northwest. We have it upon good authority that the cows were off 2.2% in butter-fat content for the duration of his stay. . . . Oh, yes! Folkers is in his office this month, for the benefit of anyone who might be interested. His summer practice was on the fourth tee at Midlothian. He plans rather shortly to invade Florida, armed with forceps and elevators to pull the teeth of the present crop of hurricanes now plaguing the place. . . . For the benefit of our literary friends, if any, "George Bernard" Cubbon has taken to writing fiction. We wonder if those stories he tells at the meetings are worthy of recording for posterity. . . . Bell, Carlson, Folkers, Rowland, and Scanlan plan to uphold the honor of the Tong in golf against the Blue Island physicians at Calumet Country Club. Their strategy will de-

pend upon a large eraser and a small unscrupulous caddy. The team will play under the handicap of Tom Scanlan's not getting any sleep. It seems his brand new son snores so loud that it keeps Tom awake nights. . . . The next meeting will take place on November 4 at Surma's Restaurant at 175th and Western Avenue. The time will be 6:30 p.m. and the speaker, Dr. Kenneth Penhale, who will discuss "Differential Diagnosis."—*Donald Pippert, Branch Correspondent.*

#### **ENGLEWOOD**

We were privileged to hear two interesting speakers at our Englewood regular monthly meeting, October 14. Dr. Lester Boyd spoke on the proper psychologic approach to patient in accomplishing restorative dentistry. He demonstrated with slides and suggestions how to overcome many of the difficult technical denture problems encountered in our office. . . . After Lester completed his talk, Dr. P. L. Mathisen lectured and answered prepared questions usually asked at his table clinics. He gave the history, advantages, success, length of time consumed, composition, and variation and control of mucostatic impression materials. His table clinic, which followed, was more easily understood and our members certainly enjoyed the technique and handling of these materials. . . . Lt. Comdr. Ed Tharp is leaving with his wife and boy, Tom, for Ewo, Island of Oahii in Hawaii, where he will serve in the Marine Corps Air Station. "Bon voyage," Ed. . . . Bill Hillemeier must have hit the jackpot. He recently purchased a seven room house in Flossmoor. . . . M. C. Baron's father passed away Sept. 29. Condolences from the Society to the family. . . . Bill Phillips' wife just returned from a four months' tour to Denmark. Bill, now you will have to behave. . . . Willis Bray and Bill Phillips are oiling their guns for some hunting this fall. . . . The E. Goldhorns just returned from a trip to the Ozarks. They met Marge of "Sunrise Mountain" fame. Ernie said the sunrise was as mellow as

a "Sunny morning flavor." . . . We are sorry T. H. Vermeulen sank his seaplane in Lake Michigan, but are glad he did not sink with it. . . . Bob Tharp is putting in two weeks at Great Lakes Naval Training Station to fulfill his obligation as a Naval Reserve Officer. . . . Jim Stokoe made the Englewood meeting Tuesday and wanted to know where to register. . . . We were happy to have George Knapp, "grandpappy" of Englewood Society, visit us. He is now practicing in Los Angeles. Wish you could make the Old Timers meeting, George. . . . Several Englewood members attended the Peoria meeting. The boys had a good time. Ed Werre was not there. T. C. Starshak was elected councilman in a very spirited election. Congratulations. . . . Be sure to mark your appointment book for our next monthly meeting which will be an "All-Armistice" night honoring the first and second World War veterans. We will have the pleasure of hearing Perce Brautigan, an outstanding speaker. He is going to talk on Americanism and veteran affairs. This meeting should be extremely interesting to all of us. All veterans, contact your buddies and bring them out to this meeting and enjoy a real program with us. . . . Kindly send all news for next month's issue to Robert J. Tharp, 11112 So. Michigan. Pullman 9426.—*John S. Boersma, Assistant Branch Correspondent.*

#### NORTH SUBURBAN

First, may we congratulate Bill Redlich on his marriage to Rosa Richter of Munich, Germany. Rosa was a member of the Olympic Ski Team in 1932. Bill met his wife while on duty in the Army of the United States. The ceremony took place in Saint Paul's Cathedral on Saturday, October 11. We all wish you two the best, Bill. . . . Among our members who attended the recent State meeting at Peoria were the following: Walter Poyer, Eddie Baumann, Russ Johnson, Pete Mundell, Charles Mansfield, Jim Fonda, Eddie Ryan, John Heller, George Howell,

Carl Jochim, Mike Pauly, Charles Cameron, Bill Mayer and Jim Keith. A good meeting and a good time were reported by those who attended. . . . Bill Rusch was told that his son's car finally arrived. Bill's son now lives in California, so—Bill decided he needed a vacation. Bill's son got the car. Bill went deep sea fishing, then took a day off to visit Willard McEwen, who is now located in California. . . . Sid Freud and his wife just arrived back from Canada where they visited the University of Toronto. The campus is like a huge estate and very well kept. The fraternity houses are shaped like old fortresses and substantially built. Most of the students are "GI" and come from the many provinces. The average tuition is \$50.00 per year. This tuition applies to the professional schools too. The school is expanding, partly because of the tremendous number who are taking advantage of the veterans' program. The roads are in bad repair, because of the recent war. Refugees can be seen in abundance, and many of our industries are moving to Canada. On the way back Sid stopped at Ann Arbor where twelve million dollars are being spent to expand the educational facilities there. . . . Jim Lynch and Eddie Sullivan are now in their new houses. It is really good news to learn of two former navy men who have solved the housing situation for good.—*R. J. DeWolf, Branch Correspondent.*

#### WEST SIDE

The West Side launched its first meeting of the season on October 14 with President Bill Gubbins presiding. It proved to be an unprecedented turnout with over a hundred members attending. Lou Weinshenker beamed from ear to ear over the sale of 39 season-meal-tickets—the largest number sold in recent years. The meeting was held at the Midwest Athletic Club where the facilities and food were excellent as usual. . . . Once again "hats off" to Harry Rubens and Mike DeRose for arranging a series of pre-dinner lectures. This year the lectures consist of a post-graduate course

in "Full Denture Construction" conducted by the well known Dr. LeRoy Kurth. Actually, as Harry Rubens puts it, "If \$500 was paid for this course, it would be well worth it." Yet it is offered to our members free of charge. Over forty enthusiastic members attended Dr. Kurth's first lecture at 6:00 p.m. From the comments heard this will probably prove to be the smallest attendance of the six lectures. Dr. Kurth's first subject was "Diagnosis and Prognosis in Full Denture Construction." The subject of his next pre-dinner lecture on November 11 will be "Impression Technic." Don't miss this opportunity to avail yourself of an excellent post-graduate course under an eminent authority in his field. . . . The after-dinner speaker of the evening was the one and only Dr. F. E. Roach. His subject was "Clasping vs. Juggling." Dr. Roach's comments were both interesting and extremely instructive. His inimitable humor was at its best. He stressed the fact that his main mission in life is the constant improvement of the partial denture service. Under the able guidance of Chic Vision, ten pounds of corned beef and plenty of beer were consumed by the guests later in the evening. . . . The "gang" that was going fishing to Lake Delton, Wisconsin, finally simmered down to Al Sells and Jack Ehrlich. Maybe the reason so many wives changed their husbands' minds about said fishing trip was the fact that Indian squaws were being hired as guides. . . . Lou Weinshenker became a proud grandfather for the second time with the birth of a son to Dr. and Mrs. Toby Weinshenker. . . . Max Chubin is elated with the lack of work for the Ethics Committee on the West Side. . . . Ed Hirschtick will take unto himself a bride on December 14. The wedding will take place in Omaha, Nebraska. Ed has now joined the throngs of apartment seekers. . . . B. Z. Kite is also on the lookout for an apartment and/or a car. Preferably both. Any help

in this respect will be greatly appreciated. . . . Hal Weiss is back on his feet after being incapacitated during the entire hot month of August with a badly lacerated foot. . . . Walter Shulruff, recently returned from service, has joined our membership and opened his office at Madison and Cicero. . . . Fred Nonnamaker was injured recently in an automobile accident near Elmhurst. He suffered several fractured ribs and a slight concussion. We are pleased to hear that he is well on the road to recovery at this time. . . . Sid Barteau and Lou Weinshenker extend their thanks to the members for the books they received through our Visitation Committee during their recent illnesses. They are both completely recuperated and back at work. . . . Fred Porath is sporting a brand new Mercury. . . . We extend our most sincere sympathy to Bill Serritella and family on the sudden loss of his brother-in-law. . . . The next meeting of the Forum will be held on Tuesday, November 4 at 12:00 noon. The place is Madigans Restaurant, 3936 Madison Street on the second floor. George Barnes, the Forum Chairman, has arranged for excellent accommodations and has an interesting list of guest speakers. Let us show him our appreciation for his efforts by large attendances at Forum meetings. They are held every second Tuesday at 12:00 noon and include lunch and guest speaker. . . . Joseph Porto, West Side Chairman of the Dental Education Committee of the Chicago Dental Society, announces that their program is now in "full swing." Lectures on Dental Health and Dental Education are to be given in all branches of our schools before P.T.A. groups and numerous other organizations. From time to time members will be called upon to assist in this program. Full cooperation of all members is vitally necessary to make this program a complete success.—*Irving Fishman, Assistant Branch Correspondent.*

Devonshire, 19 E. Ohio St.	...
Hamilton, 20 S. Dearborn St.	...
Harrison, 57 E. Harrison St.	3.50
LaSalle, Madison and LaSalle Sts.	5.00
Maryland, 900 Rush St.	6.00
Midland, 172 W. Adams St.	3.50
Morrison, 79 W. Madison St.	5.00
New Lawrence, 1020 W. Lawrence Ave.	...
Parkway, 2100 N. Lincoln Park West.	4.25
Planters, 19 N. Clark St.	4.50
Plaza, 1553 N. Clark St.	3.50
St. Clair, 162 E. Ohio St.	4.50
Wacker, 111 W. Huron St.	2.50
Webster, 2150 Lincoln Park West.	3.75

Write directly to the hotel of your choice, or to the office of the Society, 30 N. Michigan Ave., listing at least five hotels at which you prefer to stay. Our Housing Committee will do its best to obtain accommodations for you at one of the hotels you list as your preference.

Your observance of the following rules will greatly assist this Society and the hotels in providing accommodations for all who wish to attend our 1948 Meeting:

1. Be sure to state the date of your arrival and departure.
2. Share your room with another dentist from your community as the number of single rooms available is very limited.
3. Do not ask for more than one room unless you furnish the names of the occupants of the other rooms.
4. Write to only one hotel for your reservation.
5. Do not reserve a room until your plans to attend are assured.
6. Cancel your reservation immediately if, for any reason, you find you will be unable to use it.
7. Do not request a reservation at the Stevens Hotel for anyone who is not a member of the American Dental Association or a recognized foreign dental society.
8. Plan to check into the hotel before February 9. This will make it much easier to obtain your room upon arrival.
9. Arrive on the date indicated in your confirmation. Reservations at all hotels are good only for arrival on the date indicated.

ent were both entertained and enlightened. Mr. Nathaniel Leverone of Chicago was the evening speaker and had a good deal to say about the international picture. He quite obviously was "agin" much that's going on currently.

**INLAYS, FULL DENTURES  
AND PEDODONTIA**

Dr. Kenneth A. Bignell demonstrated his ability to make inlays that are masterpieces by the indirect method, at the Friday morning session. Dr. LeRoy E. Kurth followed Dr. Bignell and read a paper on "Fundamentals of Full Denture Construction." His kodachrome slides were beautiful to behold. That old campaigner with the delightful southern drawl, Dr. Walter T. McFall of Asheville, North Carolina, was the Friday afternoon speaker. Interspersed with his witticisms were a great many practical pointers on how to handle child patients.

At the business meeting on Friday afternoon, the proposed amendment to the Constitution and By-Laws, wherein the dues will be raised to ten dollars, passed without a dissenting voice. The members present seemed to realize that no dental society can function efficiently without money.

Saturday morning brought an array of table clinics of more than passing interest. Almost every phase of dentistry came in for discussion and demonstration and it was shown that the down-state boys rank equally with their Chicago confreres when it comes to dental techniques.

The 1948 annual meeting was set for the month of May at Springfield. Getting back to a pre-war schedule will please many Chicagoans who like to meet Spring a few weeks early.

## The BOSWORTH PLAN of PRACTICE MANAGEMENT

No one knows just what the economic situation will be three months—six months—a year from now. The demand for dental services may be even greater than it is today, or dentistry may be in the midst of the greatest competitive days of our history—resisting inroads from high powered sales and advertising campaigns of home construction, cars, household furnishings and personal requisites of all kinds. *The Bosworth Plan is geared to help you meet the situation whatever it may be through practice management plans designed to assure productive hours, maintain your efficiency, educate your patients and safeguard your income. Ask for full details—write today.*

What are you doing to meet the

### "FEARSOME" FUTURE?

Place non-profitable services  
on the profit side.

Improve patient education  
and case presentation.

Make your credit and collection  
policies a practice builder.

Increase your production  
without longer office hours.

Facilitate your practice  
management with Bosworth  
Administrative Helps.

## CAREFUL PROCESSING

Our regular denture service includes four important steps at no extra charge:

1. Carefully prepared impression trays for any technique;
2. Gothic Arch Tracers mounted on bases, already prepared for insertion;
3. Balanced occlusion;
4. Re-milling of dentures after the curing process—to take care of disturbances in tooth arrangement.

# BAKER 75

A REALLY *different* CASTING GOLD

We honestly believe that no better all purpose casting gold can be made than Baker 75. Yet, it is comparatively low fusing and very easy to cast. The gold and platinum content is as high as possible. If more gold were added, strength and hardness would suffer; more platinum would affect the rich gold color. Baker 75 eliminates the need of using a variety of special golds.

*Where a lighter gold color is needed, or a higher fusing alloy, use Chicago 4.*
